REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for segmenting a point distribution with numerous points into partial areas, wherein each exhibit specific structural elements. The sole independent claim identifies the uniquely distinct feature, "wherein determining for each point, a feature vector whose components are determined based on at least several scaling factors belonging to a respective point and determining the distance between the respective point and each of texture classes for all remaining points of a point distribution that are not reference points based on a distance measure in a feature space, which is fixed by components of feature vectors and allocating each of the points to a texture class for which a lowest distance was determined". The closest prior art, Murching et al. (USPN 6,693,962 B1), disclose a method of extracting regions of homogeneous texture in a digital picture which divides the digital picture into blocks, and for each block generates a feature vector as a function of

Application/Control Number: 10/019,819

Art Unit: 2621

the data moments, from the feature vectors a gradient for each block is extracted in one of two ways, either using a weighted Euclidean distance between the feature vectors or a probability mass function-based distance metric. The gradients are submitted to morphological processing to remove small bumps in the gradient field, a watershed algorithm is then applied to the preprocessed gradient field to segment the gradient field into a set of spatially connected regions of homogeneous texture; while Oddou (USPN 5,577,131), discloses device for segmenting textured images, either singularly or in combination, fail to anticipate or render the above underlined limitation obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance." Art Unit: 2621

Contact Information

- Any inquiry concerning this communication or earlier communications from the examiner should be directed to Amir Alavi whose telephone number is 703-306-5913.
- The examiner can normally be reached on Mon-Thu.. 8:00 am thru 6:30pm.lf attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mr. Leo Boudreau can be reached on 703-305-4706.
- The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306. Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
- For more information about the PAIR system, see http://pair-direct.uspto.gov.

 Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
